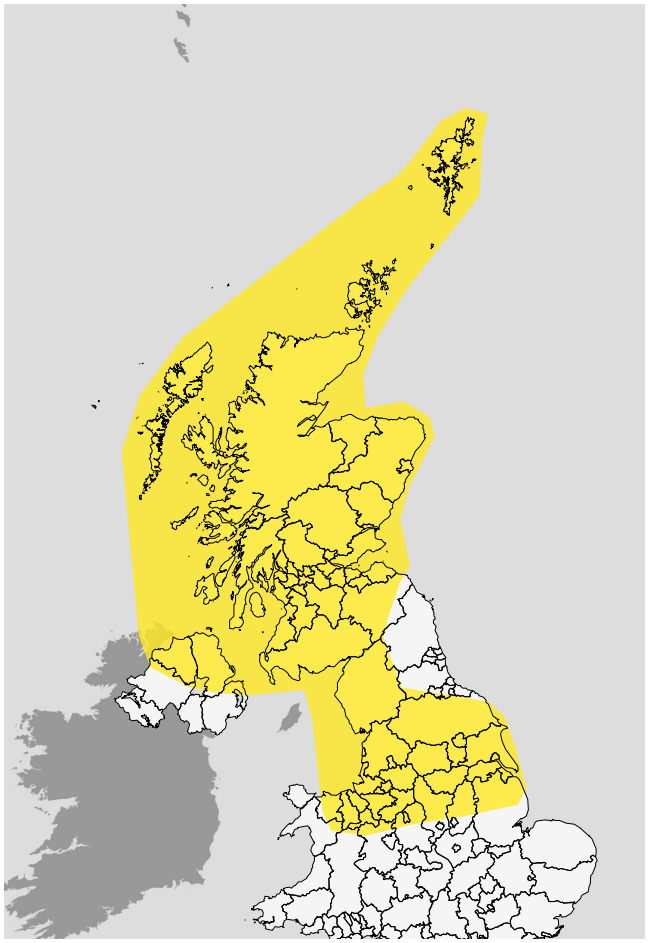
Yellow warning
Ice

Between
16:00 Fri 3 Jan 2025 and
10:00 Sat 4 Jan 2025



Icy surfaces leading to difficult travel conditions.

What to expect

- Probably some icy patches on some untreated roads, pavements and cycle paths
- Some injuries from slips and falls on icy surfaces

Further details

Temperatures will again fall widely below freezing during Friday evening. This will allow ice to readily form on untreated surfaces, particularly where roads and pavements remain wet from wintry showers. Scattered showers will fall as a mixture of rain, sleet and snow. Most areas are unlikely to see any fresh accumulations of snow though a slight covering is possible in places, especially over parts of northern Scotland.

What should I do?

Keep yourself and your family safe when it is icy.

Medium likelihood of low impacts

Issued at 09:56 Fri 3 Jan, 2025 Updated at 22:22 Fri 3 Jan, 2025

Yellow warning
Ice

Between
16:00 Fri 3 Jan 2025 and
10:00 Sat 4 Jan 2025

Further Details (continued)

Plan to leave the house at least five minutes earlier than normal. Not needing to rush, reduces your risk of accidents, slips, and falls.

If you need to make a journey on foot, try to use pavements along main roads which are likely to be less slippery. Similarly, if cycling, try and stick to main roads which are more likely to have been treated.

Give yourself the best chance of avoiding delays by checking road conditions if driving, or bus and train timetables, amending your travel plans if necessary.

Be prepared for weather warnings to change: when a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.

Reason for update

The warning area has been extended eastwards across northern England.
